

World Environmental Day

As one of the aspirations of SCII is to care for our planet where we want to create a greener & healthier environment. This World Environmental Day we have celebrated on 06-06-2022 with an agenda of planting flower plants to welcome nature's greenery, birdsong, colorful butterflies, and blooms.

SCII always focuses on employees' involvement in each and every event, for that, we had a small quiz about the awareness of the environmental day. We awarded our winner with a flowering plant to encourage caring for our planet.
